Eucerin®

LIFE-CHANGING POWER OF
DERMATOLOGICAL SKINCARE

PRODUCT GUIDE 2024

WE BELIEVE IN THE LIFE-CHANGING POWER OF DERMATOLOGICAL SKINCARE

Our skin is much more than our body's protective shield. It is alive. Inextricably and intimately linked to how we feel. The physical affects the emotional. If our skin has a problem, so do we. We make skin concerns our concern.

We have a 100-year heritage of dedication to skincare science. The research of expert dermatologists matters, developing new active ingredients matters, new clinically proven solutions really matter.

We are constantly in pursuit of scientific breakthroughs and new answers to age-old questions. Enabling tangible results and visible confidence.

The effects of skincare are not just skin deep. Stopping an itch means more than preventing the scratch. Soothing acne means more than clearing pores. Solve your skin problem; your skin feels better, you feel better.

Eucerin®

LIFE-CHANGING POWER OF
DERMATOLOGICAL SKINCARE

FACE

5 ACNE PRONE SKIN

8 HYPERPIGMENTATION

BODY

11 DRY SKIN

THE HERITAGE OF THE Eucerin BRAND

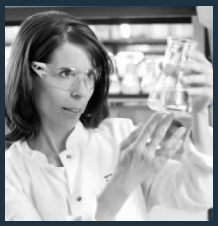

The brand has its origins in a pharmacy, founded by Paul C. Beiersdorf in Hamburg, Germany. In 1882, Paul C. Beiersdorf applied for a patent for a new type of medical dressing and so laid the corner stone for the foundation of Beiersdorf Company. Eight years later, he sold the business to fellow pharmacist Oscar Troplowitz who began to manufacture products under the Beiersdorf brand name. Close cooperation with, at that time, pioneering dermatologist Paul Gerson Unna led to products based on the very latest findings in skin research.

This close collaboration of dermatological research and product development continues right up to the present day. Because we want everyone to feel comfortable in their own skin, Eucerin® provides excellent, high-quality products based on modern research and development – this means our active ingredients as well as our products are clinically proven to be both efficacious and highly skin tolerable, even in compromised skin.

Backed up with more than 100 years of research, Eucerin® is known for its trusted medical skincare products and is recommended by dermatologists and pharmacists around the world.Medical skincare from Eucerin® combines proven efficacy with superior skin tolerability. The result: satisfied patients having a pleasurable skin feeling.

Eucerin®, being the pioneer in medical skin science, offers a comprehensive assortment for the most frequently treated skin conditions in dermatological practices.

This product guide provides a clear overview of the Eucerin®assortment: facilitating an easy orientation and selection of the appropriate product for each patient.
